PROFESSIONAL EXPERIENCE

M&T Bank, Buffalo, NY

Jun '24 - Aug '24

Technology Intern: Software Engineering

- Centralized 4 .NET webapps into a singular Angular hub, streamlining maintenance, scalability, and reusability of code
- Created effective unit tests for program at 95% code coverage using Jasmine and Karma
- Worked on a CI/CD team with full time employees using Agile methodology to efficiently deliver a quality product

Carrier LenelS2, Rochester, NY

Aug '23 - Dec '23

Software Engineering Co-Op

- Developed features for LenelS2's cloud-based web app Cumulus, utilizing multithreading to speed up existing processes
- Resolved vulnerabilities and defects to enhance quality of project, restoring functionality to 4 defunct features
- Engaged in weekly employee meetings to foster a culture of engagement and leadership development

M&T Bank, Buffalo, NY

Jun '23 - Aug '23

Technology Intern: IT

- Implemented full-stack application which reduced IT Team's troubleshooting time by 5 hours per update cycle
- Refactored scripts integral to IT operations which streamlined information retrieval and promoted accurate reporting
- Facilitated the timely completion of tasks in semi-weekly Kanban standups utilizing Jira

PROJECTS

Personal Website

Sep '16 - Current

- Designed, developed, and deployed a full-stack personal website using Angular
- Built user-engagement features that generated hundreds of user interactions
- Actively maintain and version-control the codebase on GitHub, with frequent updates and improvements

Personal Art Database

Aug '25 - Current

- Developed full-stack image gallery web application using ASP.NET Core Blazor and SQLite to showcase 100+ digital artworks, implementing tag-based organization, search filtering, and statistical analytics for portfolio management
- Built scalable content management system featuring CRUD operations, tag cloud visualization, pagination, and random discovery functionality to create an alternative to traditional social media art portfolios
